DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Response to Arguments

Applicant's arguments filed 20 December 2004 have been fully considered but they are not persuasive. Claims 1-20 were rejected via Office action dated 20 August 2004. Specifically, claims 1-3, 5-11 and 13-20 were rejected under 35 U.S.C. §102 as

Art Unit: 3653

being anticipated by Patent Number 1,110,174 by Zander, and claims 4 and 12 were rejected under 35 U.S.C. §103 as being anticipated by Zander in view of Patent Number 475,563 by Howe. In response to said rejections the Applicant has amended independent claims 1, 9, 17 and 19 to include the limitation of the tube body being centrally connected such that "the first and second ends contain money in the tube body."

This limitation is anticipated by Patent Number US 6,789,664 by Chao. The eyeglass case disclosed by Chao incorporates first and second components 215,217 of cylindrical barrel 218 that create an interior space. Each of said components and connected at the central portion of the barrel at partition 219 and contain a portion of the eyeglasses (see Figure 3).

The Examiner acknowledges that the case of Chao is disclosed to contain eyeglasses in lieu of coins. However, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, said the cross-section of said case is cylindrical and configured to accept the round profile of coins. Furthermore, both first and second components 215,217 are configured to contain coins and read on the first and second body portions of the Applicant's tube body.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the centrally, located partition 219 of Chao into the

Art Unit: 3653

coin tube of Zander to provide two coin-containing tube body portions having a connection means.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
